

MEET DART

WESTERN TIGER SALAMANDER

LOWER PLATTE SOUTH NRD

MEET DART

BABY DART

- Collected as an egg, spring 2017.
- Hatched into a larval salamander.
- He lived in the water and had gills to breath.
- Once he metamorphosed his gills disappeared and now he has lungs!
- December 2017, DART came to live with us at the NRD.

DART L♥VES:

- Building tunnels.
- Poking his head out to greet us and say "HELLO!"
- Soaking in his tub.
- Meeting students like you!

DART DISLIKES:

- Eating healthy worms.
- Getting measured.
- Being woken up from a nap.
