INTRODUCTION

The Lower Platte South Natural Resources District (LPSNRD) is one of twenty-three natural resources districts in Nebraska created by the Nebraska Legislature in 1972. The districts are organized according to the state's river basins.

The natural resources districts have the responsibilities to develop and execute plans, facilities, works and programs related to:

“Erosion prevention and control, prevention of damages from floodwater and sediment; flood prevention and control; soil conservation; water supply for any beneficial use; development, management, utilization and conservation of ground water and surface water; pollution control; solid waste disposal and sanitary drainage; drainage improvements and channel rectification; development and management of fish and wildlife habitat; development and management of recreational park facilities and forestry and range management.”

Master Plan

Neb. Rev. Stat. 2-3276 requires each natural resources district to prepare a Master. The Master Plan, which was updated in January 2019, will be in effect for a period not to exceed ten years. It serves as a broad framework for district activities, as described in the attached District's Goals, Desired Outcomes and Objectives.

Long Range Implementation Plan (LRIP)

Although LB317 passed in 2025 repealed Neb. Rev. Stat. 2-3277 and the requirement of a Long Range Implementation Plan to be completed by NRDs and reviewed by the Department of Water, Energy and Environment and the Nebraska Game and Parks Commission, LPSNRD has recognized the benefit of such planning and has continued with the internal LRIP process. The purpose of the Long Range Implementation Plan is to summarize planned district activities and budget expectations for the current fiscal year and the subsequent four years. The Plan includes projections of personnel, financial and land rights needs for the planning period.

The Long Range Implementation Plan serves as an implementation tool of the Master Plan. It lists annual programs enacted to achieve the current Goals, Desired Outcomes and Objectives.

The Long Range Implementation Plan is subdivided by Subcommittees and further by Program Areas. For each subcommittee (except for Salt Creek Flood Resiliency), there is a graph showing the budgeted expenditures for FY 2026 and projected budgeted expenditures for FY 2027 – 2030. For each Program Area, there are Actions listed for Fiscal Years 2026 – 2030, with the Fiscal Year 2026 being more detailed and FY 2027 – 2030 having less certain projects and estimated costs. On the FY 2026 cover page for each Program Area, the District “Goals” being met by this program are listed along with proposed “Action”, “Final Budget”, and “Budget Codes”. The numbers in the column, titled “Final Budget” represent the amounts included in the final budget adopted by the Board of Directors while “Other Funds” represents any funds from sources other than the District. The last column titled “Budget Code” is the code in the budget documents for each particular expenditure or revenue / other funds. Where there are no funds in the “Final Budget” column, either that action is deferred to a later year or will require no expenditure to implement.

Other Planning Documents

In addition to the Master Plan and Long Range Implementation Plan, the District has adopted a number of other planning documents to help guide the monitoring, management, and implementation actions for the benefit of natural resources. Additional plans include:

- LPSNRD Groundwater Management Plan (1995)
- City of Lincoln Comprehensive Watershed Master Plan (2022)
- Waverly Watershed Master Plan (2010, revised 2011)
- LPSNRD Integrated Management Plan (2014)

- Lower Platte River Basin Coalition, Basin Water Management Plan (2022)
- LPSNRD Water Quality (surface water) Management Plan (2019) and Update (2024)
- Lower Platte River Corridor Alliance Water Quality (surface water) Management Plan (2019, updated 2024)
- Lower Platte River Drought Contingency Plan (2019)
- LPSNRD Hazard Mitigation Plan (2025)
- Salt Creek Floodplain Resiliency Study – Recommendations Report (2020)

PERSONNEL, FINANCES, AND LAND RIGHTS REQUIREMENTS

This section of the Plan summarizes three important requirements of the District. Each requirement is vital in the operation of the District and thus must be examined for the current fiscal year as well as forecasted for a longer range period.

PERSONNEL

FY2026:

Present District full-time personnel include: General Manager (currently vacant), Assistant General Manager, District Engineer (Vacant), Projects Coordinator, Public Communications Specialist, Communication Coordinator/Adult Environmental Education, Environmental Educator, Social Media Strategist, Resources Coordinator, Resources Conservationist, Stormwater/Watershed Specialist, GIS Specialist, Water Resources Specialist, Water Resources Compliance Specialist, Water Resources Technician, Operation and Maintenance Coordinator, Operation and Maintenance Technicians (2), Land Management Maintenance Technician (2), Administrative and Finance Manager, Receptionist/Secretary, District Office Secretary/Program Assistant, Information Systems Administrator, Water Resources Compliance Specialist and Drinking Water Protection Specialist in the District office along with a Resources Technician and a Field Office Secretary (currently vacant) in the NRCS Weeping Water Field Office and two Resources Technicians and a Field Office Secretary in the NRCS Lincoln Field Office. The District employs several part-time technicians assigned to the county NRCS offices, and part-time student interns, Environmental Education Aides and summer field crews are also employed.

The Saline Wetlands Coordinator employed by the City of Lincoln, an NRD Forester and the Coordinator for the Eastern Nebraska Water Resources Assessment (ENWRA) under funding arrangements with UNL are officed at the District office.

The District will continue to increase utilizing social media, a Social Media Strategist position has been approved but not funded at this time. The Lower Platte River Corridor Alliance will continue to meet and the LPRCA Coordinator position will remain vacant at this time, although, a part-time coordinator has been discussed.

The District contracts with the Nebraska Department of Corrections for two inmate crews with supervisors to perform operation and maintenance and property management activities.

FY 2027 – 2030:

Other district staffing requirements will remain level or continue to increase in connection with the following projects: the Salt Creek Levee O&M/SWIF, Deadmans Run Flood Reduction Project, social media, the Prairie Corridor on Haines Branch project, Salt Creek Flood Resiliency, MoPac – Lied Connector, Platte River activities, wetland restoration and preservation, recreation trails, implementation of the Ground Water Management Plan, the Lower Platte River Basin Water Management Plan (Coalition) implementation, the Integrated Management Plan and Drought Contingency projects, a growing commitment to operation and maintenance, aging infrastructure rehabilitation and urban stormwater management activities. Currently the NRD Office is near capacity so additional office space would be required. The

district recently purchased a 11.09 – acre parcel near North 27th Street and Arbor Road and is planning for a new district office, maintenance shop, storage facility and Education Center.

FINANCES

FY 2026:

The District operates on a budget made up of a variety of sources, including property taxes (from the District levy), federal funds, state funds from several programs/agencies, and local funds under cost-sharing arrangements with communities, counties, and other local entities. The tables and graphs on the following pages display the sources and relative proportions of the District revenues and the level of planned expenditures for the various budget areas. Financially the District is in good shape with funding available for all projects and those funds are invested and earning interest.

FY 2027 - 2030:

The long-term projections of expenditures are contained in the following tables. The largest potential funding needs in this time horizon and beyond is the proposed Deadmans Run Flood Reduction Project, Salt Creek Flood Resiliency action, Urban stormwater programs, the Prairie Corridor on Haines Branch, the MoPac East Connection to the Lied Platte River Bridge, and infrastructure (dams and levees) maintenance and rehabilitation. The District's portion (\$13 million) of the Deadmans Run Flood Reduction Project's anticipated total cost is mostly covered during this period. Final design, updating of preliminary costs, and reconsideration of betterments will likely increase the project costs to some degree.

LAND RIGHTS

FY 2026:

Land right acquisitions will include additional easements for stream stability projects, channel repair projects, easements for open space and projects that are a part of basin master plan implementation, conservation easements and fee title for the Prairie Corridor on Haines Branch project, conservation easements, leases for monitoring wells and easements or acquisitions of wetlands. Implementation of the Deadmans Run Flood Reduction Project will require coordination between the City of Lincoln and District to acquire the necessary land rights for the project.

FY 2027 - 2030:

Additional land rights will likely be required for the Deadmans Run Flood Reduction Project, the Prairie Corridor on Haines Branch Project, for trails and trail connections, for conservation easements as proposed and considered, for wetlands, for Lincoln basin master plan implementation, and along the Salt Creek Levees in Lincoln and other flood plain areas.
